PROFESSIONAL SUMMARY

Senior Software Engineer and **Backend Engineer** with **5+ years of professional experience in Laravel** and **3+ years in Vue.js**, specializing in **backend engineering, REST API development, and scalable business applications**. Proven experience delivering **production-ready systems** for Bangladesh-based and international clients. Strong expertise in **API design, authentication & authorization, database optimization, and system maintenance**.

Comfortable owning backend features end-to-end, collaborating with frontend, QA, and product teams, and maintaining live production systems.

Immediately available and flexible for the right role.

CORE TECHNICAL SKILLS

Backend Engineering / API Development

Laravel, RESTful API Design, Backend Engineering, Authentication (Laravel Sanctum, JWT, OAuth2), Authorization (RBAC), API Validation, MVC Architecture, Service Layer Design

Frontend Development

Vue.js 3, Nuxt.js, JavaScript (ES6+), SPA Architecture, Pinia, Vuex, Tailwind CSS, Bootstrap

Realtime & Asynchronous Processing

Laravel Broadcasting, WebSockets (Reverb / Pusher), Events & Listeners, Queues, Notifications

Databases & Performance Optimization

MySQL, PostgreSQL, MongoDB, Redis (Caching), Query Optimization, Indexing, Transactions, Data Integrity

DevOps & Production

Docker, Linux (Ubuntu), Nginx, Apache, Git, CI/CD Basics, DigitalOcean, Production Deployment

Software Development Practices

Agile/Scrum, Code Review, Jira, Postman, Bug Fixing, System Maintenance

PROFESSIONAL EXPERIENCE

DINNOVA AG (Switzerland – Remote)

Senior Software Engineer / Backend Engineer

Dec 2023 – Jan 2026

- Owned and maintained **Laravel backend systems** for production web applications serving international users.
 - Built and supported an **AI-powered hypnosis & wellness application**, integrating backend services with AI-generated content workflows.
 - Designed, developed, and maintained **RESTful APIs** with secure authentication and role-based authorization.
 - Implemented user sessions, content delivery, progress tracking, and subscription-related backend logic.
 - Improved backend performance through **database query optimization, caching, and code refactoring**, reducing response times by approximately **30%**.
 - Implemented **event-driven and asynchronous features** using Laravel events, queues, and notifications.
 - Performed **code reviews**, bug fixing, and production issue resolution for backend services.
 - Collaborated closely with frontend developers, QA, and product managers to deliver stable releases.
-

DREAM71 BANGLADESH LIMITED

Software Engineer (Laravel & Vue.js)

2022 – 2023

- Developed and maintained **backend-heavy Laravel applications** for Japanese and international enterprise clients.
 - Built secure and well-structured **REST APIs** with strong validation and error handling.
 - Implemented frontend state management using **Vuex / Pinia** to improve performance and reduce redundant API calls.
 - Fixed production bugs and supported existing systems to ensure reliability and uptime.
-

NEN GROUP OF COMPANIES

Software Engineer (Laravel / WordPress)

2014 – 2022

- Migrated legacy WordPress applications to **Laravel-based backend systems** for improved scalability and maintainability.
 - Developed **e-commerce, inventory, and internal management systems** used across multiple business units.
 - Optimized database queries, indexing strategies, and backend logic to improve system performance.
 - Built reusable backend components and modules to accelerate development.
-

FAB LAB – Sher-e-Bangla Agricultural University (SAU)

Freelance Software Engineer / Backend Consultant

2017 – Present

- Designed and developed **Laravel-based backend systems** for institutional applications.
 - Implemented secure **role-based access control (RBAC)** for admin and staff portals.
 - Provided ongoing **system maintenance, bug fixing, and technical support**.
-

KEY PROJECT & SYSTEM EXPERIENCE

- Backend engineering for **ERP, e-commerce, and admin systems** using Laravel.
 - REST API-driven applications with secure authentication and authorization.
 - SPA authentication using **Laravel Sanctum**.
 - Realtime features including notifications and presence using Laravel broadcasting.
 - Database transaction handling to ensure data consistency in concurrent operations.
-

EDUCATION

B.Sc. in Computer Science & Engineering (CSE)

North South University, Bangladesh

2012 – 2019

Completed degree while working professionally due to financial responsibilities, gaining strong practical industry experience alongside academic studies.

AVAILABILITY

Immediately available for **Senior Software Engineer / Senior Laravel Developer / Backend Engineer** roles.
